Pack sizes	250 ml and 100 ml

Variations in temperature, humidity, thickness, tinting or surface type, etc. may lead to changes in drying, in coverage or in other properties.

Directions for use

GENERAL REMARKS:

Shake before use. To be applied on the work area which is to keep unpainted. It can be directly applied on the paper or above a previously applied and dry colour. Thick and quick coats.

Do not apply it on wet or moistened paper. Test the paper before using the product, because it could be difficult to remove it from fibrous, porous or not enough glued papers.

Once dry, the watercolour can be applied around and even on the film of Masking Liquid.

Do not leave the product on the work for too long, only the time required for painting. Once dry, the product is removed by peeling the film, rubbing with the finger or with an eraser.

Immediately clean brushes with water and soap. In order to prevent the liquid from drying on the tools, it is advisable to use easily cleanable brushes or pens.

Precautions

Always read the pack label before use. For more information, please refer to the Safety Data Sheet.

Issue date: 2015-01

Any technical sheet is automatically cancelled by a subsequent sheet or five years after the issue date. We guarantee the quality of our products. However, we disclaim any liability in relation to factors other than the coating itself or in relation to an unsuitable use or application method. In case of doubt, please refer to our technical service before applying the products.
